Ovalin™ 33
Dried Egg Yolk

Pet Nutrition

Ovalin™ 33

Dried Egg Yolk

Providing nourishment and support for growing pets

The original function of the egg yolk is to nourish and support the developing chick with highly valuable nutrients and bioactive compounds. When used in pet foods, yolk stimulates growth with cholesterol, offers protection with immunoglobulin IgY, and ensures brain development with phospholipids. A complete package of essential nutrients, supporting growing pets in their development.

Ovalin™ 33 is made from egg yolk that has been separated from the egg white and shell. The liquid yolk is homogenized, heated, and spray dried to create a versatile, high-quality, shelf-stable ingredient ideal for use in a wide range of pet foods and treats.

Benefits:

- Natural, essential nutrition from egg yolk
- Spray-dried for ease of use and shelf stability
- Supports growth, immune function, and brain development
- Flexible application for a variety of formulations
